DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: "LCD in which the transparent electrode of a pixel is coated with a conducting material to equalize its electrode work function with that of another electrode, to prevent flicker". This title has been adopted by the examiner; if the applicants prefer another, equally descriptive title, they should contact the examiner.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Aaron Waxler, Reg. 48,027 on 29 January 2002.

The application has been amended as follows:

In the claims:

- | | |
|------------------------|--|
| Claim 21, line 3, | change "0.25 V" to --0.25 eV--. |
| Claim 14, lines 13-14, | change "second picture electrode" to
--channel electrode--. |
| Claim 17, lines 12-13, | change "second picture electrode" to
--channel electrode--. |

End of examiner's amendment.

Allowable Subject Matter

3. Claims 3-5, 7, 14, 15, and 17-22 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The previous office action indicated that claims 6 and 8 would be allowable if rewritten in independent form. The applicant has amended claim 15 to include all the limitations of the previous claim 6, so claim 15 is now allowed. Similarly, the new claim 18 has all the limitations of the previous claim 8, so claim 18 is now allowed.

The prior art of record, particularly *Lu*, discloses the basic technique of preventing flicker by equalizing the work functions of the two electrodes by putting

additional material between them. However, *Lu* only describes putting a conductive material (ITO, for instance) on the reflective electrode, and does not teach or fairly suggest putting an Al layer on the transparent (ITO) electrode; nor putting a layer of the same conducting material on both the Al and ITO electrodes. The examiner understands the scope of claims 17 and 18 to exclude simply putting an ITO layer on the Al electrode and considering the ITO electrode to already have a layer of ITO on it - this is the invention disclosed by *Lu*.

Claim 14 has been amended to include the analogous additional limitation as in the previous claim 6, and claim 17 is the previous claim 14 with the analogous additional limitation as the previous claim 8. The prior art of record, in particular *Bohmer*, discloses a PALC device comprising coating a channel electrode with a material to modify the work function of the channel electrode. However, it does not teach or fairly suggest coating the transparent first picture electrode with some conducting material as well, as recited in claims 14 and 17. These claims are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
